

GRACE ELECTROMAX

AIR CLEANER

The Grace ElectroMax purifies tobacco smoke, unpleasant odours, dust particles, pollen and micro-organisms such as bacteria, viruses and fungi from the air in - for example - offices and smoking rooms.

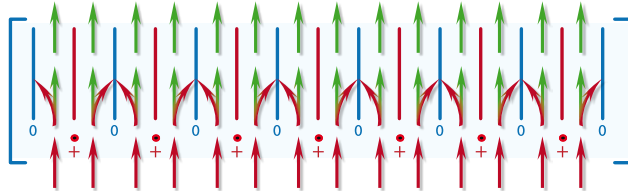

FILTERING PRINCIPLE

The Grace ElectroMax contains a unique filter system, which cleans indoor air in three phases.

Phase 1: the pre-filter captures the bigger particles of dust and other polluting items such as hairs and skin flakes.

Phase 2: The electrostatic main filter, the core of the system, catches the other, smaller, pollutants down to a size of 0.01 micron.

The ElectroMax filter in operation.

Phase 3: finally the activated carbon filter adsorbs unpleasant odours, like for example from cigarettes and cigars.
